

Chapter 370

Professor Liu was reluctant to give the ring made of technetium gold back to Sylvia.

Sylvia took the ring in her hand, but she didn't put it on for a long time.

"Why don't you wear it, dear?"

"This is a little too expensive." Sylvia looked at the ring in her hand. It was worth more than ten billion dollars, which was more expensive than the entire Lins Group!

Henry took the initiative to take the ring, grabbed Sylvia's tender hands, and put it on Sylvia's ring finger. "Honey, this is my gift for you. Don't care if it's expensive or not. You just need to wear it as an ordinary ring."

Sylvia looked at her ring finger and said, "That's what you say, but how can I take it

as an ordinary ring?"

"Haha, this is your problem." Henry gently tapped Sylvia's little head.

Sylvia reached out and touched the words on the surface of the ring, and her heart was full of sweetness.

Bing and his men quietly walked to the side and continued to stay here. It was just a shame.

Soon, they arrived at the theme of this dinner, which was to win the bid. Many companies took out their trump cards.

Since ancient times, every project with an official background had earned nothing but a lot of money. For this project, everyone had made a lot of effort.

However, the support that those small companies could provide was far from that of a large enterprise like Lins Group.

Sylvia promised that she could offer one billion yuan as a private research fund. All research laboratories and scientific research materials would be provided by Lins Group.

Lin's number of one billion caused ninety-nine percent of the people present to retreat.

One billion! Lins' plan this time was terrifyingly big.

Professor Liu nodded as she listened. She was very satisfied with the condition given by the Lins Group. This time, a large amount of money was needed to support scientific research. Of course, the more, the better.

Many people who came to bid thought in their hearts that this time, it was estimated that the Family Lin had it in the bag. In the end, how much could they make of this project at most? One billion? 1.2 billion? It

might even be less than one billion. Mrs Lin took great risks to invest one billion. If she did not make much money, she would lose a lot.

"This woman is really bold."

"If you let me to take charge of the Lins Group, I still wouldn't dare to say one billion yuan today."

Some people were discussing in private.

Sylvia looked at Professor Liu and said one billion yuan. She also thought about it for a long time. According to the professional assessment of Lin's professional team, this project was full of calculation, including raising the price of the surrounding land and the official subsidies. It was only 800 million yuan. One billion yuan was a big gamble.

This time, Sylvia not only wanted to make money, but more importantly, she wanted

to consolidate the name of the Lins Group. The appearance of the Zhao's Group had brought great pressure to the Lins Group. In this way, the prestige of the Lins Group would slowly disappear.

Sylvia was right. When she said the number of one billion, many people looked at her differently. The sudden rise of Zhao's company made most people feel that Lin's family would collapse at any time. But now, what Sylvia did told everyone that Lin's family would not collapse. There was still a gap between Zhao's family and Lin's!

Some people had even thought of the congratulatory words and were ready to congratulate Sylvia at any time. They wanted to congratulate her on winning this project.

"Our Zhao's Group is willing to invest two billion dollars." Owen Zhao's voice

suddenly sounded.

Two billion!

All the people present fixed their eyes on Owen at this moment. They were deliberately making trouble for Lins Group!

It would definitely be a loss to invest 2 billion yuan in this project!

Owen looked at Sylvia and looked at her provocatively.

The people in charge of the small companies felt the atmosphere between Owen and Sylvia. They were shocked. This was the battle between the big bosses. They had spent billions of dollars every time they fought. They just wanted to win.

Sylvia didn't look good. She didn't expect that Zhao Enterprise would actually invest two billion yuan. Even if the project was completed, they would lose one billion yuan. Was this one billion yuan used just to

suppress her?

Owen's way of doing this once again made everyone feel the rich funds of Zhao Enterprise.

"The funds are okay. About the research..." Master Wong glanced at Owen. This project not only needed funds but also needed professional talents to cooperate.

"In terms of research, our QZ Group will be responsible for it." Bing suddenly stood up. "Our QZ Group will collaborate with Zhao's Group and jointly take responsibility for this project."

After Bing finished speaking, he looked at Sylvia proudly.

This kind of thing caused an uproar among the people present.

In the beginning, everyone thought that the QZ Group and the Zhao Family, including the Chows' and the Lin's, would

fight to the death this time. But now they found that the Zhao and the QZ had reached an agreement that they wanted to squeeze the Lin's together!

If these two groups were really determined to suppress Lins Group, then Lins Group's building was in jeopardy.

Even Sylvia didn't expect that Zhao Enterprise and QZ would unite. This was completely a way of playing without thinking of consequences. She just wanted to make Lin Enterprises unable to survive.

Two billion yuan was absolutely too much for Sylvia now.

"President Lin, what should we do?" Cathy stood beside Sylvia and asked anxiously.

Sylvia shook her head and said, "Let it go. There's no point in fighting for it."

"Er..." Cathy's face was full of unwillingness.

Owen looked at the expression on Sylvia's face and said with a smile, "Sylvia, don't give up. How much is the ring on your hand? Why don't you ask your husband to invest more money? What do you think?"

Owen's action seemed normal, but in fact, it pushed Sylvia into a desperate situation. Whether Sylvia invested a billion yuan or the Zhao's invested the two billion yuan, the two groups were no longer relying on this project to make money, but to establish their prestige. Now, the effect of the establishment of the Zhao family had been achieved. If the Family Lin continued to invest more than two billion yuan, it would be difficult to play a role in establishing its prestige in the eyes of outsiders. After all, the suppression of the Zhao family was directly doubled. If the Family Lin wanted to continue, it would have to increase its funds by two billion yuan. Otherwise, it would not be effective at all.

But if the Family Lin really wanted to take over the project with 3 billion yuan, everyone would only think that the Family Lin was forcing themselves to do so. In order to establish their prestige, they had to invest 2 billion yuan more. This was a stupid thing.

It could be said that Owen's choice for the two billion yuan was just right, and it was not a lot.

Owen raised his eyebrows to Sylvia and said, "How about it, President Lin? I've doubled the price you offered. Do you dare to double my price? I, Owen Zhao, put it here. If you dare to double it, I dare to follow!"

Chapter 371

Owen's words forced Sylvia to a desperate situation. Now that he had said it out, if Sylvia dared to double, he would dare to follow her. This kind of words had already revealed Zhao Enterprise's full confidence.

If Sylvia really followed, he could casually laugh and admit defeat. No one thought that Zhao Enterprise was really scared. After all, if Sylvia doubled, she would lose 3 billion.

But now, if Sylvia didn't follow, she was afraid of Zhao's family, which had an impact on the status of Lin's family in Yinzhou.

Owen's simple action directly put Sylvia in a dilemma.

"Come on, if the Lins Group pays 3 billion yuan for prestige, others will say that

Sylvia is a fool."

Lins Group would be completely suppressed by Zhao's Group from today on.

"President Lin, what do you think? Do you want to follow or not?" Owen looked at Sylvia with a smile.

"Follow!" A resolute voice sounded.

The owner of this voice shocked all the people present. It was not Sylvia, secretary Cathy, nor Henry, but Danny Chow!

The young master of the Chow's!

"We, Chows', are willing to invest two billion yuan in Lins Group!"

Danny's appearance and his words made all the people present to open their mouths wide. Everyone looked at Sylvia with admiration. They didn't expect that this woman had done such a thing. When did

she unite with Chows'?

The smile on Owen's face disappeared at once.

In this case, even Sylvia herself was confused. Danny's attitude had changed a lot. At that time, Danny threatened her with a piece of land. As a result, he gave all the land to her the next day and even gave her several properties. Chows' did not compete with her for many other projects, but today, he suddenly proposed to invest 2 billion yuan.

For the Chow's, two billion yuan was equal to a quarter of the entire Chow's!

"Is there something wrong with your brain? Is it not enough for your Chow Enterprise to be oppressed by Lins Group for so many years?" Bing couldn't help but scold him directly.

Danny sneered. "You still have a long way

to go before you can fight against Lins Group!"

After that, Danny walked up to Henry and said with a flattering smile, "Mr Zhang, are you satisfied with what I did?"

"You are smart." Henry nodded with satisfaction.

After Henry's approval, Danny's face was full of joy. This attitude shocked everyone once again. Did the young master of the Chow's show his goodwill to the son-in-law of the Family Lin?

Sylvia was very shrewd. Looking at Danny's attitude toward Henry, she figured out a lot of things at once. No wonder Danny and his father suddenly came to the door of the Lins Group to apologize to her and even gave her so many land and real estate. All of this was because of Henry!

When Sylvia thought of her attitude

towards Henry at that time, she was full of apologies. It turned out that he had silently helped her from the beginning.

Sylvia calmed down and looked at Owen again. "President Zhao, our Lin's company's investment has increased to 3 billion now. So, are you still following us?"

Owen's expression changed. Now, his situation was the same as Sylvia's. He would lose 3 billion. If not for the prestige he had just made, what he had just said would become a joke. Undoubtedly, he was picking up a stone to smash his own feet.

Chows' sudden appearance disrupted Owen's entire plan.

After thinking for more than a dozen seconds, Owen laughed out loud. "President Lin, it's really a good play. Our Zhao family has just gained a foothold in Yinzhou. It's the right time to make friends.

Let's give this project to your Family Lin. We can get along with each other in the future ."

Owen's performance made everyone understand that Zhao Enterprise had lost in this game.

The Lins Group had joined forces with the Chows', the original second largest group in Yinzhou. Their current status would not be shaken unless the Zhao's Group could spend another sum of money that surpassed the Chows'.

Bing stood aside with a gloomy face. Today, in order to take revenge on Henry and Sylvia, he made two preparations to humiliate them first-hand, but because of his ignorance, he became a laughing stock. The second one, together with Zhao Enterprise, he wanted to suppress Lins Group. In the end, he was suppressed by Lins Group.

Bing stared at Henry and Sylvia and suddenly said, "Some people only know that they don't have the ability, so they rely on the blessings of their elders. This kind of person can be arrogant now, but how long can they be arrogant in the future? It's really hard to say. Lose so much money just to save their reputation."

Bing's words were to find an excuse for himself.

However, everybody could tell that what he said was an excuse, but it was reasonable.

It was conceivable that after this disturbance, Bing would bring the flames again. What happened today would be spread all over the world, and there would even be all kinds of versions.

Henry put his arm around Sylvia's shoulder and said, "The more incompetent a person is, the louder he will speak."

"What a joke!" Bing sneered. "Do you dare to compete with me, Henry?"

"You don't deserve to be compared with me." Henry gave Bing a contemptuous look, held Sylvia in his arms, and walked out of the banquet hall.

Bing only felt that his powerful punch on the cotton made him particularly uncomfortable.

Sylvia and Henry didn't stay in the Glory Hotel any longer. When they got out of the hotel, they drove straight home. As for the project, Cathy was in charge of it, so Sylvia was absolutely relieved.

One night passed quietly.

The next morning, Henry just got up, walked to the courtyard, and punched at the old tree.

Anna Jiang dragged a suitcase out of the house and stood behind Henry. "Mr

Zhang."

Henry looked back and asked in confusion, "Are you going for a trip?"

Anna smiled slightly and said, "I'm here to resign. During this period of time, President Lin is no longer in any danger. And I've received the news that the person who wanted to harm President Lin before cannot hurt her anymore, which means that my task is over."

After saying that, Anna looked at the tree in front of Henry and continued, "Besides, Mr Zhang, you're here to protect President Lin, so I am not worried."

Henry nodded. He still had a good impression of Anna. This woman was willing to work hard and very responsible. "Have you accepted the next task?"

"I already have a new task. The employer is waiting for me. Mr Zhang, please tell

President Lin my decision."

"Well, do you need me to send you off?"
Henry pointed to the car next to him.

"No." Anna raised the car key in her hand.
"I still like to drive my car by myself. You know, we don't have much freedom in this business. We don't have any vacation. We'll just take it as a trip if we're on our way."

"Then I wish you..." Henry smiled at Anna and said, "Have a good trip."

"Thank you." Anna opened the car door and sat in.

Chapter 372

When Sylvia got up and heard that Anna had left, she sighed. After two months of getting along with her, she would have some feelings for her. Anna had been protecting Sylvia all the time. The sudden departure made Sylvia feel that there was something missing.

Henry had long been accustomed to such separation, so he was used to it.

Henry prepared breakfast for Sylvia. After Sylvia finished eating, Henry said while packing up the bowls and chopsticks, "Honey, I have something to do today. Go to the company yourself."

"Okay." Sylvia nodded.

Now, Sylvia had a little attitude towards Henry. She subconsciously listened to Henry for a lot of things.

Watching Sylvia leave, Henry stood at the door of his own courtyard and said coldly, "You've been staying for more than two hours. Aren't you tired?"

"Haha, I think I've hidden well." A figure slowly walked to the gate of the courtyard.

It was a middle-aged man with whiskers. He was untidy and casually dressed, with only a pair of slippers on his feet.

"Let me introduce myself. My name is Kim Yuan, and I belong to the Sharp Knife." The middle-aged man took the initiative to reach out his hand to Henry.

Henry didn't even look at the hand that the other party had stretched out. "Why are you looking for me, the man from the Sharp Knife?"

"Haha." Kim chuckled, "Mr Zhang, you really like to ask even though you know the answer. I want to talk to Mr Zhang about

the fire in Liao Family's manor."

"Then let's stand here and talk." Henry went to the gate of the courtyard.

Kim was stunned, and then he said with a smile, "I thought Mr Zhang would invite me to have a cup of tea."

"I only invite my friends to drink tea. If you have something to say, just say it."

Kim nodded and said, "Then I won't keep you guessing. I believe that you, Mr Zhang, are also a member of the Ancient Kungfu Family. That day, you were taken away by the Liao family. When you left, the Liao family's manor was in a big fire. Do you have anything to explain?"

"No." Henry shook his head. "What does it have to do with me if their manor was on fire?"

"Mr Zhang, you were taken to the Liao family. What happened that day? How

could there be a sudden fire in the Liao family?" Kim stared at Henry with his eyes. "I hope you can tell me the truth, Mr Zhang."

"Oh." Henry nodded. "The whole Liao family was killed, and the fire was also set by the other party. I saw it with my own eyes. Since you don't want to catch the murderer, why did you come to me?"

Kim obviously did not expect Henry to directly say that the Liao family was killed. The Liao family was an ancient family. The death of a family in a big fire naturally attracted the attention of the Sharp Knife. The Sharp Knife specially sent people to investigate the bodies, and the result was that the whole Liao family was killed, and almost none of the bodies of them was intact.

With the help of the Sharp Knife, it was easy to know that Henry was taken to the

Liao family that day and he was safe and sound. Kim put his target on Henry and made him his breakthrough.

Kim's idea was to find some evidence from Henry's words, then lock him up and interrogated him. However, he didn't expect to get such an answer, which made him feel like he couldn't do anything about it.

Kim looked at Henry and was silent for a long time. Then he said, "Did you see someone kill all the people of the Liao family?"

"Yes." Henry nodded. "He didn't even leave a whole body, which is very cruel. But at that time, I didn't have time to take photos and videos."

Kim asked again, "Since the Liao family has been killed, why are you unharmed?"

"You are really funny." Henry looked at Kim

as if he was looking at a fool. "Do those people who killed the Liao family have any necessary reason to kill me? If I want to kill a fish today, would I kill all the fish in the pond?"

Facing Henry, Kim only felt that he couldn't do anything for a while. The other side's words seemed to be full of flaws, but there was no evidence for him to use.

Kim thought for a long time and could only say one sentence, "I suspect that you have something to do with the Liao family's murder case. Please come with me."

"Later, I will rest at home." Henry replied lightly. Then he turned back and went into the house. After drinking a cup of tea and lying down for more than half an hour, he went out.

Kim drove an Accord with yellow plates to the centre of the city with Henry.

"Sir, where are you going to take me?" Henry leaned leisurely in the back seat of the car. "I have to go to work today."

Kim parked the car in front of a cafe. The door of the passenger seat opened, and a beautiful woman in a long dress got in the car. She glanced at Henry and asked Kim, "Is this the one?"

"Yes." Kim nodded.

The beautiful woman turned around and held a cup of coffee in her hand. "Tell me, why did you kill the whole Liao family?"

Henry looked at the beautiful woman with a strange face. "Why don't you wear underwear?"

The beautiful woman's face was angry. "B*llshit!"

"You are also talking b*llshit." Henry shrugged his shoulders. "Have you seen me kill the whole Liao family?"

The beautiful woman listened to Henry's words, and her chest heaved with anger. "I'm not in the mood to play this kind of game with you. Our Sharp Knife mission is very heavy, and you've wasted our time. Can you bear the responsibility? How did the Liao family die?!"

Henry held his hand. "Didn't I tell your colleague that the family was killed and all of them were dismembered? What's wrong?"

The beauty was stunned and turned to look at Kim.

Kim gave a wry smile. "That's what he told me."

The face of the beautiful woman changed a lot. She turned back and glared at Henry again. "Did you see the Liao family being killed with your own eyes?"

"Yes." Henry nodded.

"What about the law enforcer?"

"He was also killed," Henry said matter-of-factly, "I watched them die. There was so much blood. So cruel."

The beautiful woman suddenly reached out her hand and slapped in front of her. "Out of the law! We are law enforcement, and we are not in the mood to joke with you. If you don't tell the truth, don't blame us for taking drastic measures!"

"I'm telling the truth." Henry was puzzled. In this world, no one would believe that he was telling the truth.

The beautiful woman turned her head, looked at Kim, and shouted, "Turn around, go and catch all the Lins. I'll see if he would tell the truth!"

There was a hint of hesitation on his face. "I'm afraid it's not in accordance with the rules."

"What are you talking about? What is against the rules?!" The beautiful woman's face was ugly. "My whole Liao family has been killed, but you still mention the rules to me!"

The beautiful woman said as she grabbed the steering wheel.

Kim pushed her away and said, "Hedy, calm down. Don't be impulsive."

"What do you mean by calm down? If your family was dead, would you calm down?" The beautiful woman roared and glared at Henry again with hatred in her eyes. "Let me tell you, I, Hedy Liao, will definitely make you pay for it with blood!"

After Hedy finished her words, she directly pulled down a black box on the roof of the car. This action made Kim's face suddenly change.

"Hedy, what are you doing?"

08:52 ■■■

"The car turned, and the law enforcement surveillance device has been broken!"
Hedy sneered.

Chapter 373

Henry looked at Hedy. He didn't expect that there was a member of the Liao family in the Sharp Knife.

Kim stopped the car and parked it in the middle of the road. "Hedy, are you sure you want to do this?"

"Otherwise?" Hedy asked, "My Liao family can't die in vain."

"Okay." Kim nodded and clenched his fists. "I'll listen to you. You can do whatever you want."

After saying that, Kim stared at Henry with a sullen face.

Henry sneered. "You know very well what kind of people the members of the Liao family were. Shane Liao bullied men and women in school. Your master had joined

forces with law enforcer and kidnapped me and took me to the Liao family. Such behaviour has violated the rules, hasn't it?"

"It's not up to you to tell us what our Liao family should do! You are just an ordinary member of Ancient Kungfu family. Even if our Liao family bullied you, you should bear it!" Hedy stared at Henry, "At last, I ask you whether the death of our Liao family has anything to do with you?!"

Henry glanced at the law enforcement surveillance device that was buckled down by Hedy and grinned. "Yes."

"You!" Hedy's face changed. She knew that she had been set up.

Just as Hedy was about to say something, a violent feeling of collision hit her.

A pickup truck crashed into the back of the Accord.

The airbag exploded immediately.

Then, a few more cars crashed into this car and the violent impact almost made Kim and Hedy faint.

"Since you said that the car turned over, then let's turn it over." Henry sat firmly in the back seat. "As a member of the Sharp Knife, you use your positions for personal use and revenge. People like you, if they stay in the Sharp Knife, they will also harm others. In this case, you will die."

Henry's cold voice rang in their ears.

The car stopped shaking, and the two of them immediately turned their heads to look at the back seat. In their sight, Henry slowly put on a ghost mask.

At the same time, the driver's and the passenger's door of the Accord were pulled open.

At the same time, several figures wearing a ghost mask appeared in the sight of Kim

and Hedy.

Henry opened the back door and walked out. "Make it look like the car turned over. Give a little respect to the Sharp Knife. Also, solve all the problems that can be solved. I don't want the Sharp Knife to bother me again."

Hedy looked at the masked figures in front of her, and her heart was filled with deep fear. No wonder her family was killed, and the person they provoked was a Reaper...

Kim's face was full of regret. "Hedy Liao, this time, you've caused me a lot of trouble!"

After Henry got out of the car, he took off his mask and threw it into a truck next to him. With his hands in his pockets, he wandered to the street in downtown.

As Henry left, there was a burst of an explosion.

An hour later, Henry sat in a cafe and looked at his mobile phone. The headline of the Yinzhou News was already occupied by the news that an official car had suddenly turned on the road. The news said that the driver of this official car and a woman sitting in the car were both dead, and two passers-by were slightly injured.

When Henry was about to put away his mobile phone, the phone rang, and the caller was Jenny Qin.

As soon as Henry picked up the phone, Jenny's voice sounded urgent, "Henry, do you know how to gamble on stones?"

Henry thought for a moment and said, "I know a little about it."

"That's to say, you understand. Our company has expanded a new trade, which is to gamble on stones. I don't know much about it. Can you help me check it?" Jenny said on the phone.

"Stone gambling?" Henry was full of doubts, but he still walked toward Hengyuan Trade Company.

At this moment, on Jenny's desk, there were a lot of documents about gambling on stones.

"President Qin, sign it."

"Yes, President Qin, this is a once-in-a-lifetime opportunity. The profit of gambling on stones can be said to be huge. Everyone wants to do it, but whether it will be approved or not is one thing, and the key is that there is no connection!"

"For Hengyuan, this is an opportunity to be on the same level as the Family Lin!"

In Jenny's office, many managers were persuading her.

"Wait." Jenny looked at the document on the table, waiting for Henry to come over.

"What are you waiting for, President Qin? They've told us we only have half an hour to think about it!" One of the company managers looked anxious.

Jenny looked out of the window and then looked at her mobile phone. When she was about to call Henry again, she saw the door of the office was pushed open and Henry appeared in the office in a hurry.

Looking at Henry's messy clothes, Jenny's heart was full of joy. It seemed that this man was still in her thoughts.

"Why do you want to gamble on stones? There are many tricks in this industry. You must have heard of it, haven't you?" As soon as Henry entered the door, he asked.

The managers of Hengyuan, all looked at Henry with confusion, not knowing who he was.

Jenny stood up from her executive chair

and smiled sweetly at Henry. "That's why I called you. I don't understand. It's fine as long as there's a man who knows."

Hearing Jenny's words, the managers looked at Henry with an ambiguous look.

Jenny handed the document on the table to Henry. "This is the project this time. Take a look."

"I don't have to look at it." Henry shook his head. "Now that you want to gamble on stones, someone should have brought you a batch of raw materials, right? Where are the materials?"

"The warehouse."

As a trading company, Hengyuan's warehouse could be said to be the most important place in the whole company. It covered a large area and each warehouse was clearly separated.

There were three containers, which were

21 meters long and 7 meters tall, outside the warehouse.

Jenny came here with Henry and a group of office managers from Hengyuan.

Jenny pointed at the three containers and said to Henry, "The materials are all in it."

Henry nodded and asked, "What is the other party's request?"

Jenny waved her hand. A manager came forward and said to Henry, "They asked us to take at least 300 tons of goods a month and sell them to us at the price of 200 yuan per kilogram. This is the first batch of goods. If we think the goods are good, we have to sign a contract of at least one year."

Henry frowned. "One kilogram for two hundred yuan? This price is higher than the market price. 300 tons per month. Do you think you Yinzhou market is big enough?"

"Now it's hard to say about the market. This is a gamble." Jenny walked up and said, "The channel this time is obtained through the official special approval because we have blown up the mountain. If we can get this, it will be an opportunity for Hengyuan."

Henry walked to the container and opened the door of the container. What he saw were all kinds of stones. They were densely packed, big and small. The small one was only as big as a palm and the big one was as tall as a man.

Henry opened all three containers in a row, glanced at them, and then shook his head at Jenny. "No."

Chapter 374

"What's wrong?" Looking at Henry's appearance, Jenny asked doubtfully.

Henry pointed to the stones in the three containers and said to Jenny, "The reputation is very important to gamble on stones. At the very least, stones can be sold, but now there is almost no possibility that there is anything worth in these three containers. If we can't even find one gemstone on the first day, we can't continue to gamble on stones."

Listening to Henry's words, Jenny nodded thoughtfully.

A manager said, "President Qin, with all due respect, this friend said that this pile of stones couldn't be used. It's purely a guess. Stone gambling is all about luck. Who dares to say that there is nothing in

these stones just by looking at the appearance of the stone?"

After the manager finished his words, he glared at Henry with hostility in his eyes.

"Who said that there is something wrong with our stones?" A voice came from the side.

Henry looked back and saw a middle-aged man walking towards him with three strong men with ferocious faces.

The three sturdy men looked fierce. They clenched their fists while walking.

The middle-aged man was wearing a suit. He didn't look so fierce, one could get a bad feeling just by looking at him.

"Kid, do you think there's something wrong with our stones?" The middle-aged man walked up to Henry. At the same time, the three strong men beside him stood in front of Henry and looked at him.

Henry frowned. "Is this batch of stones yours?"

"Do you have any opinions?" The middle-aged man looked at Henry, his eyes full of threats.

Henry nodded and said, "We don't want your stones."

"Okay, we are doing business. If you don't want it, we won't force you." The middle-aged man smiled and said, "Since we can't do business, then let's go."

After the middle-aged man finished speaking, he turned around and winked at the manager of Hengyuan who had just spoken.

The manager clenched his teeth and said, "President Qin, this is a chance. Don't miss it. Don't listen to others and miss such a good opportunity!"

Henry sneered and looked at the manager.

"You are Hengyuan's man. How many benefits have they promised you so that you can cheat on President Qin? If President Qin buys these three containers of waste stones per kilogram, how much will you make? This business is worth 670 million. How much would they give you, 100 million?"

The manager's face changed and scolded, "B*llshit! What do you mean by saying that I will have benefits? Don't slander me."

Henry glanced at these jade stones and said, "According to the normal market price, a stone per kilogram should be between 60 to 80 yuan, but now it's sold for 200 yuan?"

"Do you think that the transportation fee is cheap?" The middle-aged man looked around and said, "How much are the logistics costs for tons of goods?"

"Logistics costs?" Henry looked confused.

"Do you have any logistics costs for these stones? Didn't you get them from the mountain we had blown up some time ago?"

"You!" The middle-aged man's face suddenly changed.

Jenny frowned and said, "Henry, do you mean..."

Henry walked to the container and picked up a stone casually. "Our rock group is a Neoarchean rock mass with complex rock types, dominated by biotite quartzite and mica quartzite, followed by mica granite and mica monzonite. These stones are strong. The rocks are grey and light grey-green. Some of them have similar mottled structures, such as clean edges, stitches and so on. The stone in my hand is completely from the mountains around us. Look at these three stones. They're all matching stones. They're just ordinary

stones!"

As soon as Henry finished speaking, Jenny immediately looked at the company manager and said, "Didn't you tell me that these stones are from Yun province?"

"I... I..." The manager opened his mouth wide and didn't know what to say.

The middle-aged man's face changed a few times, and then he shouted, "It's really funny! These stones I transported from Yun Province, and you actually said that these are the surrounding waste stones!"

Henry shook his head and said, "I didn't say that they are all the surrounding waste stones, and there are still normal stone stones."

Hearing Henry's words, the project manager breathed a sigh of relief.

The middle-aged man's face also looked much better, and his heart was secretly

happy. He just thought that this boy was likely to reveal this scam, but suddenly the boy was scared of him.

Henry walked forward and picked out a total of nine stones which were only the size of a fist from the three containers. "These nine stones are indeed not the surrounding stones. Judging from the material, they are from Yun Province. Unfortunately, there is not a single "green" in these stones."

Henry shook his head and threw the nine stones casually.

The so-called "green" meant that there was no gemstone inside.

Obviously, Jenny completely trusted Henry between the company manager and Henry. She looked at the company manager and said, "I need a reasonable explanation."

He was about to turn to the middle-aged

man for help.

The middle-aged man's eyes were drifting. After a few seconds, he waved his hand. "We won't do business with you. There are many people doing this business. Now even if you want to buy it, I won't sell it. Let's go!"

After the middle-aged man finished speaking, he waved his big hand and was about to take his men away.

"Go?" Henry chuckled and said, "You want to leave now that you can't swindle us? The amount of hundreds of millions that you lied about is enough for you to get arrested. Jenny, call the police."

"B*llshit! I'm a liar? Do you have any evidence?" The middle-aged man's neck was stiff. The three strong men with ferocious faces beside him no longer had that kind of arrogant expression on their faces. All of them stood aside with fear,

afraid that they would be implicated. Obviously, they all pretended to be rude just now.

"Where is the contract?" Henry stretched out his hand to Jenny.

"The contract..." Jenny looked at the project manager.

With a shiver all over his body and a fierce look in his eyes, the manager tried to run away.

The company manager was fast, but how could he be faster than Henry? Henry took two steps forward, kicked the company manager over, and grabbed the contract from the other party.

Glancing around, the contract stated that these stones were all transported from Yun Province, which was enough to sue these people.

Seeing that the matter was revealed, the

middle-aged man also wanted to run away.

"Hurry up, let's go!" The middle-aged man shouted at the three strong men beside him.

Three strong men shook their bodies and covered the middle-aged man to run out of the warehouse.

"None of you can escape!" Henry stood in front of the warehouse entrance.

"Boy, I advise you not to ask for trouble!" A strong man clenched his fist and threatened.

"Oh." Henry nodded his head expressionlessly. He punched three times in a row and knocked down the three strong men.
